Ontario's Energy and Water Reporting and Benchmarking (EWRB) Initiative

NEW

Benchmarking Help Centre

Help for York Region Building Owners

King-Vaughan MP Deb Schulte visits Windfall Centre to announce Natural Resources Canada funding for the Benchmarking Help Centre

Windfall Ecology Centre is opening a Benchmarking Help Centre to assist York Region commercial building owners in lowering operating costs as they comply with Ontario's Energy and Water Reporting and Benchmarking (EWRB) regulation. ClimateWise Business Network will be operating the Benchmarking Help Centre. The service is available to all York Region building owners and operators.

The new regulation, O.Reg. 506/18, requires owners of buildings over 50 000 square feet to report energy and water consumption annually using the free Portfolio Manager online benchmarking tool. The regulation is administered by the Ontario Ministry of Energy, Mines, and Northern Development and came into force last year. By measuring energy and water consumption and benchmarking against comparable buildings, businesses are motivated to take actions that reduce consumption, operating costs, and greenhouse gas emissions.
